Landscape Architecture: The difference is in the design.

Landscape Architecture is the cornerstone of our work at Roundtree Landscaping, Inc. **We believe good design is the most important aspect of every project.** It's very easy to get off track during a landscape project without a good plan. We consider your property's unique attributes and challenges, as well as your budget, to create a plan which meets your wants and needs.

We design with plants that are waterwise, tough & beautiful in North Texas landscapes!

The difference is in the design and the details.

We also offer these services:

1

Design: We design a landscape plan that suits your personality & works within your budget.

2

Installation: We properly build your hardscape and install your gardens.

3

Maintenance: We know your landscape is an investment. We maintain its value.

We offer the following Landscape Architecture Services by our staff of Licensed Landscape Architects, Irrigators and Certified Arborists:

- Residential area plans
- Residential master plans
- Residential irrigation plans
- Commercial landscape plans
- Commercial irrigation plans
- Tree survey and mitigation plans

"Lush landscapes for every home."
